## ABOUT THE GATHERING

# A week-long unconference where crypto meets the commons

The Crypto Commons Gathering is an annual retreat in the Austrian Alps where builders, researchers, and activists working on regenerative finance, cooperative economics, and commons-based infrastructure come together for a week of co-living, co-creating, and radical imagination.

Now in its **6th edition**, CCG has become the premier gathering for the people building post-capitalist economic infrastructure. Not a conference — a convivium.
